GIRARD COLLEGE.

We cut the following from the close of a well written article in the Alta, on the subject of a "State University." We perfectly agree with the writer on the general subject discussed, and make the extract for the purpose of giving the public a correct view of the matter referred to in it:

"Notice the Girard College. That, as an edifice, is an ornament to the City of Philadelphia, but what benefit did it confer upon the orphan whom its donor intended it to educate, during the many years in which its millions of funds were being squandered. The first object, education of youth, was made the last, if indeed, it got any place in the arrangements."

Now we have been perfectly acquainted with the affairs of Girard College for the last ten years, and know that the above is calculated to give a wrong impression.

Mr. Girard died in 1833, leaving an estate worth fully $13,000,000, of which, according to the will, the city of Philadelphia was Trustee. Most of this vast sum was in fact given to the city itself in various legacies, and provision was made for the erection and endowment of an Institution for Orphan Boys. The "city fathers" chose to understand the terms of the will in a liberal spirit, and the costly buildings and ornamental grounds now known as the "Girard College," are the results, though manly built out of the *income* of the funds reserved for the endowment of the same. And this is all that remains of much value, out of that vast estate. It is the only, and a very worthy, monument of the old millionaire What has become of the "millions" spoken of by the Alta, the city fathers of Philadelphia from 1833 to 1840, perhaps can tell. They did not build the college, we know that.

As to the *utility* of the Institution, we are perfectly satisfied. The last time we saw it, almost two years ago, there were gathered together in its ample halls between three and four hundred rosy faced boys, from the ages of five to ten years; and since then, we understand, their number has been doubled. And we do not know, throughout the institutions of the world, one which promises such a career of usefulness as this. Its teachers, and internal arrangements for the comfort and health of its pupils, are unparalleled. We were well acquainted with Judge Jones, its former President; and we know that a better man than Dr Allen, who now occupies this position, cannot be found; and we fully believe that great good will be accomplished by means of this charity.

CHEAP LITERATURE.—We saw the other day, at one of our auctions, the elegant History of England, by Macauley—2 vols. 8vo., well bound—sold for $1.75 a set. They were purchased by one of our booksellers, who not many months since offered them to us at the low rate of $16 a volume. Sic transit gloria, &c.

BEHIND THE DOOR.—As we passed down an alley yesterday, an individual stood behind a door with a bottle to his mouth and a large knife in one hand. If he only sticks to the former death will be as sure, though a little less hasty, as though the latter were brought into requisition.

PRICES CURRENT.—We often hear loud complaints of the inaccuracy of quotations given in these from our city, and we believe they are not wholly unfounded Our own reporter, we are sure, has hitherto sustained a reputation for correctness superior to any other; and the estimate placed upon his labors at home is a cheering evidence of his merit. Still we know that errors have sometimes crept into his work, and an intelligent mercantile friend of ours observed that he himself had always found it necessary to go over prices current here, with his pen, to assure himself that they actually contained the going rates at the sailing of the steamers. There are, we know, resulting from the wonderful fluctuations of the market, many difficulties attending the keeping of a correct price current, and no other is worth the keeping.

THE SEA SERPENT AGAIN.

Two gentlemen who sign themselves Clement Perkins and Thomas Cleaves, write to the editor of the Biddeford (Me.) Advertiser, under the date of "Kennebunk Port, Aug. 3d," as follows:

"Last Saturday morning, between 7 and 8 o'clock, we had, for the space of ten or fifteen minutes, a fair view of that 'animal' which has been so often seen, and called the Sea Serpent. The portion of his body out of water we judged to be eighty feet, his form that of a large bamboo, the distance between the joints two feet, his motion undulating, velocity that of a common walk of man, his head resembling the bill of a duck. Our distance from him was, at the farthest, not more than thirty rods, and the sea was a perfect calm."

The editor of the Advertiser adds to the above:

"We had a long talk with Mr. Perkins, and from him had a perfect description of his majesty, the Sea Serpent, and are truly convinced that such a monster really exists. Mr. P. has been accustomed to the sea for fifteen years, and is perfectly well acquainted with the sights to be met with upon the ocean. He is also a man of undoubted veracity, and one who never indulges in marvellous stories."

All the Eastern papers, nearly, give the above account. We confess that we fully believe in the veritable existence of this Megalosaurian. He has often been seen in the waters of the New England coast, within the last twenty-five years, and that, too, by men whose character for veracity, and whose opportunities for the observation of him wer the best desirable. To catch him could not add confidence to the belief of his existence, though it might add to our knowledge of his nature and habits.

SLAVE COLONY IN CALIFORNIA.—Under this heading the Jackson Mississippian, of the 9th inst., has the following paragraph:

The skeleton of a plan for planting a slave colony in California, south of 30 deg. 30 min., has been submitted to us by several public spirited gentlemen who are ready to embark in the well conceived enterprise. That the plan is eminently worthy of public attention, we entertain not a doubt. It is not the creation of hair-brained visionaries, but a suggestion which addresses itself to every Southern statesman and philanthropist. It will claim the early consideration of every slave owner, and the patronage of Southern legislatures.

The plan may be a good plan, but like many others, it will, we fancy, never be acted upon.

THE CALHOUN STATUE.—It was proposed to raise the statue of Calhoun yesterday, but the wind was so strong that it was probably not attempted. Mr. Sproule, agent of the underwriters, Mr. Whipple, the diver, and the boatswain of the cutter Morris, nearly succeeded in raising it on Saturday. Mr. Whipple, who was under the water about two hours, ascertained that part of the box is gone, but that the statue is uninjured, and now lies completely imbedded in the sand, which has no doubt contributed to its safety. It will be recovered as soon as there is a lull in the weather.

☞ The New York Tribune, speaking of the recent charges of frauds by public officers in California, remarks:

It will yet be seen that the recent vast and sudden expansion of our territorial limits is the cause of a long train of mischiefs and disorders. It was the extent of its conquests and possessions that ruined the Roman Republic, and the same influences now endanger our own. An executive at Washington, on the shores of the Atlantic, never can exercise an efficient and adequate supervision over subordinates on the coasts of the Pacific. It will soon be found necessary to have a sub-Postmaster General on the Pacific, a Treasury and treasury audit there, &c., &c.; in fact, a distinct executive machinery. And by-and-by it will be realized that an intimate and cordial alliance between the Anglo-Saxon States of the Atlantic and those of the Pacific will be preferable to a community of laws, mails, finances, &c., &c. But we can wait for that.

☞ An article in an English journal on the subject of California, expresses the opinion that no effect will be produced upon the value of gold, by the discoveries in the mining regions. "If California were all gold, and all California to be transported into Europe, the world would actually be none the richer." But the journalist expresses a doubt that ten millions of gold have been found in all the diggings. After a time, he says, the thirst of gain will be succeeded by that of conquest. "China and Japan long without overlookers, have got Brother Jonathan that picked a quarrel with and conquered Mexico."

The same article appears to contemplate with certainty, the overthrow of the Chinese and Japanese, under the resistless influence of the Anglo-Saxon race. Emerson's remarks are quoted in relation to this subject. "Things" he observes, "seem to say one thing and say the reverse. The appearance is immoral: the result is moral. Things seem to lead downwards, to justify despondency, to promote rogues, to defeat the just. But by knaves, as by martyrs, the just cause is carried forward. Although knaves win in every political struggle; although society seems to be delivered over from the hands of one set of criminals into the hands of another set of criminals, and the march of civilization is a train of felonies, yet general ends are somehow answered."

☞ In relation to the Portuguese affair, the Courier and Enquirer says.

We learn by special telegraph from Washington that a special bearer of dispatches from the American Squadron in the Mediterranean, arrived in that city yesterday. He brings intelligence that Mr. Clay, after receiving his passports, went to Naples with an expectation of returning to Lisbon in two months. It is said that he withdrew from his mission on account of offensive language in which the offer to pay all claims, except that for the Gen. Armstrong, was couched.

☞ We know a lady in this town, says the Cincinnati Commercial, who has lost three husbands by death within ten months and is now engaged to a fourth. An active woman, truly.

☞ Burke told Carrick at Hamptbn that all bitter things were hot. "Indeed," replied Garrick, "then what think you of a bitter cold day."

☞ The editor of the Lake Superior Journal, in alluding to the discovery of gold in the copper region, says: We have been shown, by Capt. John Halloran, of this place, a piece of quartz rock, from Lake Superior, containing several dollars worth of pure native gold. The gold shows itself in particles, disseminated through the quartz, the largest of which, as near as we could judge from the appearance, weighs more than a dollar. He states that a friend in the mining country had discovered rocks of this description, of which this is a surface specimen, as its appearance clearly shows it to be; that there was no reason, object or chance for deception in regard to it. He brought it down in order to have it examined, and we saw it thoroughly tested, in several ways, and there is no question as to its being genuine gold.

It is not, however, the first discovery of gold on the lake; geologists have detected it in several instances, and the lamented Dr. Houghton was confident that gold would be found in considerable quantities; and it has been supposed, from minutes made by him and from remarks on the subject, that he knew more about its location than any one else, and even rather more than he had ever made known

We have no disposition to start a golden humbug story here at the Northwest, (California will monopolize everything in that line) and we believe our copper and iron mines will be of more permanent and lasting wealth to this section and to the whole country than even a rich gold mine on Lake Superior. Still, we shall now expect to see this gold-bearing rock thoroughly tested and analyzed, and the country surveyed more fully, with a view to farther discoveries in this precious metal, and we hope the sanguine expectations of the fortunate discoverer of this gold mine will be fully realized

Michigan Constitutional Convention.—This body adjourned on the 23d of August. Its session commenced on the first Monday in June No doubt the members were greatly aided by the result of constitutional conventions in other states. They have rather revised the old constitution than made a new one.

Homestead exemption and an elective judiciary are among the new features. There is to be no independent supreme court, but eight circuits, with one judge elected in each. Every county of 10,000 inhabitants has four terms of court a year. The question of negro suffrage is to be submitted to the people. Indians may become citizens. A proposition to refer to popular vote the question of licensing or not licensing the sale of ardent spirits was rejected. The legislature is required within five years to establish free common schools, to be open three months in each year, and also as soon as practicable to establish a state agricultural school, setting apart the twenty-two sections of all spring lands for its support.

The convention provided that every newspaper publishing the constitution should have $25 for it. A good quarrel attended the close of the session. Mr. McClelland, ex-M. C. and candidate for the U. S. Senate in place of Mr. Fitch, chairman of the committee on phraseology, was accused of changing the homestead exemption provision, by making it the duty of the legislature to except not *more* than forty acres instead of not *less*, and was justly castigated for the trick. How this point was finally settled we are not informed.

The constitution, as finished, was adopted by a vote of 59 to 11. It is to be accepted or rejected by the people in November next.

Splendid Vessel for REALEJO and PANAMA—Passage uniformly $75. The fast sailing A-1 coppered and copper fastened N. York packet ship OSCEOLA, 1000 tons burthen, Richardson, master, will sail for the above ports without fail, on TUESDAY, October 15th. She is, without doubt, the most magnificent vessel for Realejo and Panama, which has yet been put up. Her reputation as a first class vessel, and a fast sailer, is well known. She made the passage from New York to Liverpool in the unprecedented time of 17 days She will now make Realejo in 18 days, and to Panama in 25 days from this port. As regards neat, clean, and comfortable accommodations, no vessel, in any line, will bear any comparison with her. She can accommodate 75 passengers with splendid and spacious state rooms. She has three cabins on deck; she has an elegant separate cabin, with a piano, which will be reserved for ladies and families. She is airy, being ventilated with the newest improved patent ventilators. Her berths are all single and furnished with new mattrasses and bedding; she is carpeted throughout. Her fare will be superior to any steamer on the Pacific, a bid of which will be furnished several days before sailing. Her owner flatters himself that he has sent off better arranged vessels than any other line in San Francisco, and he has spared no expense to make the Osceola superior to them all Gold dust and treasure shipped and insured. For further particulars, or passage, apply to her owner,
C A. Smith,
o8 tds Dalton House, Jackson st.

For REALEJO and PANAMA—The fine A 1 coppered and copper fastened ship ELLEN BROOKS, 850 tons burthen, Swayne, master, will positively leave for the above ports on FRIDAY, Oct. 20th. This large and splendid ship has superior accommodations. Persons taking passage in her will not suffer the inconvenience attending small and over-crowded vessels. Her officers will be found experienced and polite, and every attention will be paid to the comfort and convenience of all on board. As regards her fare, her owner is determined not to be beaten by any vessel in port. She will remain at Realejo long enough for passengers to decide upon the feasibility of the new route, having the option to proceed to Panama. Gold dust and treasure shipped and insured. For further particulars or passage, apply to her owner,
C. A Smith,
o8 tds Dalton House, Jackson st.

IMPORTANT NEWS from NICARAGUA by the steamer California —Hon. E. G. Squier, late Minister from the Government of the United States to Central America, reports that: "In passing from one ocean to the other, by way of Nicaragua, $15 will suffice to transport a passenger across the country. Tolerable accommodations may be obtained for about $9, and one may go across in a cart for $7. The Nicaragua route is by many a mile nearer to all the ports of the United States, and the salubrity of the climate must be deemed an advantage that Panama cannot possess."
Ottinger & Brown have now a Regular Line of packets running between this port and *REALEJO*. For freight or passage apply to OTTINGER & BROWN,
o1 Commercial Buildings, Central Wharf.

England—The subscribers have now made arrangements to lay on a line of packets from Liverpool to San Francisco, by which passages may be secured to California, Oregon, Vancouver's Island, and the Sandwich Islands.
Those who may have no correspondence in England, can have goods or freight purchased or forwarded at the lowest rates, and with quick dispatch; or money invested in the funds or otherwise, as parties may desire.
Exchange on Great Britain, in sums to suit those wishing to make remittances, for sale.
Dixon, Forbes & Co,

☞ The Office of Publication is on the second story of the building, in Montgomery street, occupied by Payne & Sherwood, Auctioneers, where advertisements and communications may be left. The management of th business of the establishment will be under the charge of Mr. A. SKILLMAN.

☞ Thompson & Hitchcock, agents of Gregory's Express, corner of Wall and Pearl streets, New York, are authorized to receive advertisements and subscriptions for the Pacific News.

AGENTS FOR THE PACIFIC NEWS.—Col. Joseph Grant is an Agent for Sacramento City and the valley above.

D. H. Mason, Esq. will hereafter act for us in San Jose, to whom subscriptions may be paid.

THE ELECTION.

Although perhaps less satisfactory in the general result, to the Democracy than it might have been, there is still nothing to discourage, but everything to lead us to hope well for the future. Our distinct party vote, notwithstanding the efforts to divide us, is a strong one, and evidences the fact, that when our party are united, San Francisco, like the entire State, is Democratic to the core.

The result of the election shows the choice of a Democratic Senator, and one Assemblyman, Mr. Hoff, while the remainder of the ticket is Whig, with the exception of Mr. Simpton, the independent candidate for Harbor Master. The Whig member defeated is J. A Collins, Esq. Not a man do the 'independents' carry, except Harbor Master, and the causes which elected him, attach no credit to them.

The contest has learned us a lesson which we trust will be of service in the future. It will have taught a lesson that should not be disregarded by those who have the management of political affairs. But upon this and kindred subjects we shall have more to say in a day or two.

FOR THE UMPQUA.—The enterprizing firm of Winchester, Paine & Co. as will be seen by their advertisement, will soon send another vessel to that region, toward which public attention has been so largely attracted recently. The extent and fertility of the Umpqua valley, as well as the known existence of rich deposites of gold in the streams and gulches on the western slopes of the cascade mountains—the inexhaustible supplies of timber and building stone, and not least the grant by Congress of 640 acres of land, without charge, to actual settlers, are strong inducements to those who intend to make permanent locations in this country. And while the mining regions of Californea are filled up to a great extent, here is an opening to obtain advantages which only those *first in the field* can so profitably secure. We advise those who are doing nothing here to look to this.

HIGHWAY ROBBERY.—As a couple of Chinamen were on their way in from the Mission, yesterday morning, they were stopped by a couple of fellows on horseback, and ordered to deliver up their money. They complied, but immediately gave information to police officer Howard, who, with Mr. Dexter, set off in pursuit. From the description of the horse rode by one of the rascals, Mr. D. recognized him, and soon after himself and the officer met the two Sydney chaps riding quietly along the street, and took them into custody. The Chinamen swear positively as to their identity, and in fact the gold and purse which they said they had lost were found upon the thieves, as was also a very fine gold watch, probably stolen. They were properly cared for. These highway robberies are getting quite too frequent for bodily safety, and when a conviction does follow an arrest, we trust the punishment will be to the fullest extent of the law. An example of hanging one or two would have a salutary effect.

THE CANVASS.—In one or two of the districts the canvassers did not get through with their labors until seven o'clock last evening, making an all night and day's job of it. The "splits" were innumerable, and rendered the labor of canvassing exceedingly difficult and arduous.

ACCIDENT.—A sloop, the name of which we did not learn, was capsized yesterday morning, opposite the North Beach, in attempting to enter the harbor. The wind was blowing very strong, and the vessel was turned bottom up. The individuals on board reached the shore.

THE RESULT OF THE ELECTION.

FROM KLAMATH AND TRINIDAD.

By the kindness of Mr. Bullitt, who came passenger in the Emily Farnham, arrived yesterday from Port Trinidad, we have intelligence from that quarter of a most favorable character, the Klamath River being navigable for a considerable distance towards the heart of the mining region bordering its upper tributaries. There can be no doubt but a large emigration will next season find their way into the fertile valleys of the north, and among the placers which exist on all the mountain slopes as far towards the north as explorations have been made.

We give below a letter from Mr. Ehrenberg, whose account of discoveries on the Klamath was published in the Pacific News some two or three months ago. The statements of Mr. E. can be relied upon in every essential particular, as he speaks generally from personal observation:

TOWN OF KLAMATH, }
Sept. 27th, 1850. }

Editor of Pacific News:

Dear Sir:—After a long time I again have the pleasure of sending you a few lines from our section of country.

The news from the mines is really flattering, at last, surpassing my most sanguine expectations; and, without being an enthusiast, I calculate on 50,000 miners next summer. The gold region already explored is immense, and creeks and rivers (and dry diggings, it is said,) are added daily. The Trinity is deserted. By a party of gentlemen coming down from Camp Creek, in canoes, for provisions the other day, we heard of 1500 miners in that vicinity and on Salmon Creek, nobody making less than ten dollars a day; but since the last discoveries in other parts, close by, an ounce per day is considered too little to stop for. The gold is all large, and deposited near the surface, not only in the beds of the streams but also high up on the mountain sides. My recent excursion to the burnt or table mountains assures me of rich diggings within twelve or fifteen miles of the town, around the branches of Blue Creek. Our town is now completely surveyed and going ahead; the Indians are becoming more friendly every day, considering us a different tribe from the other whites in these diggings. A few days ago Major Clark, Messrs. Myers, Strawbridge, Peters and myself sounded the channel, over the bar, and no bottom was found with four fathoms of line out, at low tide, and at the very lowest stage of the river; four fathoms of water were found along the north bank, about one mile up the river, with a safe anchorage. I shall probably visit the mines shortly myself, and you may expect some description of the most rugged and shattered country ever seen by man; of ancient river beds crossed by chains of lofty mountains; and other interesting items.

There is one fact which I have to mention yet; that is, these are the first mines from whence I have seen no disappointed men; everybody talks extremely well and all are satisfied of the immense riches buried beneath the surface.

Respectfully yours, H. E.

At Sea, off Panama, Sept. 3, 1850.

At a meeting of the cabin passengers, held in the saloon of the steamship Carolina, off Panama, of which Judge O. C. Pratt of Oregon was Chairman, and S. Taylor, Secretary, the following preamble and resolutions were unanimously adopted:

"Whereas experience has but too often taught us that the comfort, pleasure and social harmony of passengers, in a great degree depend upon the course of the master and officers of the vessel; and whereas the uniform urbanity: the gentlemanly conduct, and untiring efforts of Capt. R. L. Whiting, Surgeon T. G. Grey and Purser E. Monroe, together with the other officers of the Carolina towards us, leaves no choice in justice, gratitude and honor, but to make known to them and to the public our sense of their worth and exertions in our behalf:"—therefore,

Resolved, That we tender to Capt. R. L. Whiting our grateful thanks for the just, impartial, and obliging manner in which he has borne himself towards all.

2d. Resolved, That through Capt. Whiting, we offer our thanks to the officers of the Carolina for the uniform and pleasant manner in which they have seconded the efforts of the Captain to combine order and decorum with amusement, and unbroken harmony during the passage from San Francisco to Panama.

3d. Resolved, That the Secretary present a copy of these proceedings to Capt. Whiting, also, the Agents in New York, Messrs. Howland & Aspinwall, and that they be printed in the Pacific News.

O. G. PRATT, Chairman.
SAM'L TAYLOR, Sec'y.

R. O. Lowry, Daniel Norcross, T. G. Wells. E. J. Townsend, M. Herr, in behalf of Cabin Passengers of steamship Carolina.

☞ It will no doubt be a source of consolation to the "Independents"—especially the "Democratic" portion of them, to know that their open bolting and treason have defeated a portion of the Democratic ticket. Had the votes which were thrown away upon the mongrel ticket, been cast where nine-tehths of them would have been but for this ticket, every democrat would have been elected. Disappointed ambition often leads men to do many things which cooler moments would bury in oblivion. So will it be with the prime movers in this independent movement.

BATHING.—In hot or cold weather, nothing is so conducive to health as a clear skin, while those who practise frequent ablutions may be taken sick, those who do not are sure to be, and then the water-cure comes too late. Though sick or well, we go for the luxury of a bath.

Those who have long resided in San Francisco, well understand this. And as there are no facilities for sea-bathing here, we behold at all times a crowd of the "unwashed," waiting the moving of the waters at Mygatt & Bryant's excellent establishment in Washington street, below Kearny.

FRUIT TREES—We understand that Mr S. R. Boardman is about leaving for the States for the purpose of shipping to California a large assortment of fruit trees and plants. The will be put up at Boardman's celebrated Nursery in the western part of New York, and will be forwarded across the Isthmus. A good opportunity will thus be afforded the permanent residents of California to beautify and adorn their ranches and gardens after the style of thdir old homes in the States.

MAYOR BIGELOW.—This gentleman has returned to Sacramento, so far recovered in health as to enable him to devote a portion of his time to business. His many friends will be gratified to learn that there is so good a prospect of his entire recovery, even though with the loss of one hand.

FLEA BANE.—We have been shown an article of this kind which is said to be very effective in keeping the varmints at bay, if sprinkled about the furniture, wearing apparel, &c. It is prepared by Dr. Charles & Co. Try it.

☞ Hon. E. Gilbert will accept our thanks for congressional documents and speeches.

Editor of Pacific News:

My attention has been called to a publication which appeared in your journal about the 6th ult., styled a "*Report of the Expedition to the Stockholders of the Umpqua and Klamath Exploring Expedition,*" and signed by Heman Winchester, C. Thos. Hopkins, and Horace J. Paine, for Winchester, Paine & Co.; in which report it is asserted that the expedition having reached the Umpqua, they met there one Levi Scott and others, and then goes on to state as follows: "For the purpose of ascertaining the capacities of the harbor, Mr. Scott had just concluded a bargain with Capt. McArthur, of the Government surveying schooner Ewing, to come down and attempt the entrance for one thousand dollars, which was exacted for that service, and he (Scott) had now come down to meet his appointment with that officer."

To me, Messrs. Editors, it seems certain that Messrs. Winchester, Paine & Co. cannot have realized the baseness of this slanderous publication against the character of a distinguished public officer, or they would have hesitated before they put their names to, and by so doing, have endorsed and added weight to it.

The truth of the matter, is as far from the statement just set forth by Scott, as truth is from deliberate falsehood. One Mr. Levi Scott did make his appearance at the mouth of the Columbia, while we were engaged in our survey of that river, and requested of Gen. Adair, U. S. Collector at Astoria, a favorable introduction to Capt. McArthur, and as a prelude, Gen. Adair introduced him to me, when Scott at once opened his business by saying that he came down to offer inducements to us to visit the Umpqua River, and would pay us a thousand dollars if we would go there.

I told him in reply not again to mention the subject of money, as an inducement; if so I would withhold any communication with him, but that we were determined to find the mouth of the Umpqua river, and that if he could go there by land, and make a signal so that we should be able to recognize his presence there, we would aid him all in our power; that first we must complete our work in the Columbia, when we should examine the entire coast to San Francisco, which of course included this river.

On mentioning the subject to Lt. Comm'g McArthur, he was equally indignant with myself, but attributed it to the ignorance of the man as to the nature of our service, and said he would not decline to receive his local knowledge in consequence of the blunder he had made.

I was afterward present at the interview between Capt. McArthur and this Levi Scott, in which he (Scott) alluded to his willingness to pay a thousand dollars; when Capt. McArthur told him we did not want his money—that he was determined to examine the Umpqua entrance whether Scott was there or not—but that if said Scott should be there, he (Capt. McArthur) would take pleasure in showing him where buoys should be placed to make the bar and river accessible to commerce, (if it should prove to be so,) and that then it was probable that Mr. Scott could expend one thousand dollars judiciously, in placing the buoys—and then proceeded to show said Scott the plans and estimates for the buoys, anchors and chains, for the Columbia River, which we were having prepared under the Government appropriation: but that inasmuch as there was no appropriation applicable to the Umpqua, it would be best that the individuals interested on that river should not wait for the action of the Government, but do it themselves.

We reached the Umpqua in August, and Capt. McArthur passed in and out, over the bar, without seeing anything of Mr. Scott, who, it appears by this statement, had met the explorers and gone up the river with them.

The hydrographical party of the Coast Survey have had difficulties of no ordinary character to surmount in their operations on this coast and Oregon for the past year, and yet *all that the Government expected has been accomplished, and much more,* as our reports and work will show.

Although to some it may seem a small matter—the officers of the Expedition will not submit that the character of their Chief shall be slandered by any man or set of men; hence you are desired to publish this refutation of the base assertions of this Scott, and now so widely endorsed by Messrs, Winchester, Paine & Co. Respectfully yours,

WASH'N A. BARTLETT,
Lieut. U. S. Navy,
Ass't U. S. Coast Survey.

FROM SACRAMENTO.

Our thanks are due Palmer & Co., and Hawley & Co., for Sacramento papers. The following is the item of election intelligence, which we copy from the Transcript:

The State of the Polls.—At the last accounts the following was the state of the vote so far as ascertained. For Clerk of the Supreme Court, Tharp was ahead in both polls. He will probably beat Morse two hundred votes in the city. For Superintendent of Public Instruction, Butterfield was ahead. For Attorney General the vote is very close. At the Court-House Cone leads McDougal, and at the Council-Room McDougal is ahead of Cone. For District Attorney, Latham is ahead over one hundred votes. Robinson has an undoubted majority in the city for the Senate. For the Assembly, Dunlap thus far leads off; Bigler follows, and Thayer stands next.

DRUGGED DRINKS.—A young man who came to our city on Thursday last, on a visit to some friends, was picked up on the night following, near the corner of J and Second streets, in a state of utter stupefaction. In this state he was conveyed to the house of a friend, where he has since remained in the same state, except at times, when reason is partially restored. From what has been gathered from him, it appears that he was probably in some drinking establishment on I street, kept by those who understand drugging these potations, and having partaken of a draught, his senses were seized with a sudden numbness, and he became to a great degree in a state of mental aberration. His recollection was lost from that time until after he had fallen into the hands of his friends. The young man, who was doubtless the victim of some drugged potation, had a valuable gold watch and some "specimens" of gold taken from his person, either whilst in the house where he drank, or else after he fell on Second street.—[Transcript.

Army Movements.—The St. Louis Republican, of Aug. 11th, says—

We learn that the 7th regiment of U.S. Infantry, Col. Plympton commanding, which has just returned from Florida, and has scarcely encamped at Jefferson barracks after severe service, has received orders from the Secretary of War to prepare for distant service, and move immediately for Fort Leavenworth. Orders or instructions, we understand, have also been received to push forward, with all possible dispatch, the equipment and mounting of the recruits for the dragoon regiments, of whom about 300 are now at Jefferson barracks.

We know not the purpose of these movements, but they look very much as if President Fillmore is preparing to support his position on the questions between Texas and New Mexico. The promptness of the movement would indicate a determination to be prepared for any contingency.

A Mr. Joseph Outlaw, of Camden, Ala., while in a state of mental derangement, committed some horrible and singular excesses. He bit off the head of a chicken, and after sucking the blood with an insane relish, swallowed the disgusting morsel. He then went to his wife, knocked her down, seated himself upon her, and inflicted a number of fatal wounds upon her body with a gum lancet. She soon died, and the maniac husband is confined in jail.

A Miss Smith, formerly of Luzerne county, died a few days since at Danville, Pa., under circumstances leading to a suspicion that she was the victim of a dreadful outrage. Her death-bed disclosures caused the arrest of a lawyer named Rankin, and Wm. H. Crandall, a physician of the town in which she formerly lived. Crandall has been committed to the Bloomsburg jail.

ALBANY ARGUS.—We are glad to welcome to our editorial table a full file for August of this ably conducted democratic sheet. For a quarter of a century it has occupied the position of the leading paper of the state, if not of the Union, and the same distinguished pen which has adorned its columns in times past, still controls its course.

☞ Cook & Lecount will accept our thanks for the N. Y. Police Gazette, and other papers.

THANKS.—Our friend Mr. Cox, of the post-office, lays us under obligations for a full file of the Herald for August.

CRAZY.—Some chap who is editing the Marysville Herald. He is either crazy, or "one of the boys."

From our Private Correspondence.

PANAMA, Sept. 8, 1850.

Dear General:

We arrived in this place on Wednesday afternoon, about three o'clock, making about 7 1-2 days from Acapulco. After writing you from that place, about six o'clock of the same evening the Columbus arrived, and many of her passengers went on shore. Amongst them came three or four gamblers, who as a matter of course went to betting with the natives at monte, and after a short time lost all their dimes. On the strength of this the b'hoys made a grab for the Bank, which they obtained without much difficulty. The military were called in to arrest the rioters, and were about making a charge upon them, when one of the gamblers threw a candle, which struck a soldier between the two peepers, at the same time presenting a six shooter. Upon this reception the military made a retreat through the door they entered, and at the same time the rowdies took good care to retreat from the opposite. On whole the affair was one of the most ludicrous imaginable, as well as disgraceful to the American name: and thus ended the evening's performance.

The next day, however, as two of the principals in the affair were about starting from the beach for the steamer, a guard was sent to arrest and take them before the Alcalde; but they found it rather a difficult job to accomplish, as the sight of a six shooter seemed to give them fearful apprehensions of a hole in their bread baskets, which to them was anything but agreeable, and so the b'hoys were suffered to depart in peace. The matter was then represented to the American consul, who immediately went on board the Columbus, and brought the two offenders on shore for a hearing. The result was that they were let off by paying back the amount of money taken from the bank.

☞During the time of the hearing before the Alcalde, the Columbus hoisted her signal for all passengers to be on board, and fired two guns. About one hour after the firing of the last, she weighed anchor and sailed for Panama, leaving a number of her passengers behind, among them one of the firemen, and the baker of the ship. Several of them, however, succeeded in obtaining tickets for the Carolina, and were brought to Panama on her.

To-morrow I start for Chagres. The cholera has been very bad here, but is now on the decrease. The particulars, however, you will get in the Panama papers.

Yours truly, D. N.

MORTALITY REPORT.—Deaths for the week ending October 5, taken from the register of Mr. Youans, office on 4th street, between J and K.

Daniel Taylor, 50, Illinois; Levi Wilson, 36; Lowell, Mass; C P Conrad, 47, Cattaraugus Co., N Y; Wm. C Mansfield, 10, Mass; Charles Edwards, 1 year 6 months; John Shriver, 45, N Y; Mary Wallace, 1 year 8 months; David Bates, 33, Illinois; Asahel N Van Vere, 24, Wisconsin; Mrs Hammons, Missouri; Martin Edwards, 35, Kentucky; W C Sherwood, 33, Duchess Co., N Y; Miss Nancy Nations, Missouri; Heinrich Tickleman, 37, Indiana; James Carnahan, 23, Arkansas; Dulcinea Cooper, 8 months; Aaron Chase, 42, Iowa; Francis Callahan, 25, Indiana; Alexander Parks, 16, Illinois.

Diseases—Typhoid fever, 2; congestive fever, 1; dysenteric fever, 1; typhus fever; 1; fever, 1; diarrhoea and dysentery, 8; cholera infantum, 1; consumption, 1; disease unascertained, 2. Total 19. Of the above, 15 were males, 4 females, 16 grown persons and 3 children.—[Sac. Times.

THEFT.—We learn that a man named Murray, of Louisiana, lost $600 while in a house on North Beach, last night. Do the police ever visit this quarter?

FALL.—The staging used in building the new hotel, corner of Clay and Kearny streets, fell yesterday afternoon, and precipitated four or five men who were on it to the ground.

ALEXANDER HAMILTON.—This modern financier was fully committed for trial, on examination yesterday before Recorder Tilford. So that it seems a man may not take another's name in vain, though he may fire a pistol into crowd with impunity.

EX-GOV. KENT, OF MAINE.—Gov. Kent, Minister to Rio, was on board the Goliath steamer, at that port, on the 4th of July, on which occasion an oration was pronounced, and the Declaration of Independence was read by Mr. B. F. Wyman, of N. Y.

A celebrated wit was asked why he did not marry a young lady to whom he was so much attached. "I know not,' he replied, "except the great regard we have for each other."

PROF. PAGE'S EXPERIMENTS.

The Southern Press, at Washington, whose editor was present at the experiments of Professor Page, showing the motive power of electro-magnetism, does not have a very high opinion of them. All the other papers speak favorably of these experiments, but we are inclined to be sceptical. Motive power can be generated by electro-magnetism; but it is too unequal, and besides very expensive. As the matter is interesting, we copy the remarks he makes upon the experiments with the engine:

The engine was geared to a circular saw, and we were shown that it could *split* successively a number of *pine* boards an inch thick and two feet long—with a visible diminution of its speed. Is this the work of a four horse engine? Why, everybody has seen who has travelled a railroad, a single horse geared to a horizontal wheel of the oldest fashion, exerting a power to cut transversely the firewood for the locomotive. Let Mr. Page try this experiment, and we are satisfied from what we saw, that a stick of oak wood of the average size for locomotive furnaces, if applied transversely to his four horse engine, will stop it—dead still; although it will not stop a single actual horse.

"Now, the process of ascertaining the power of an engine is perfectly simple, is more convenient than Dr. Page's, and is conclusive. It is to raise a given weight, in a given time. A single horse power will elevate 23,000 pounds one foot in one minute. Let Dr. Page submit his engine to that test, and then we can see whether he has accomplished any thing—whether he has surpassed Ross, Faraday and others."

The Military Movements in Texas

The people of Texas continue much excited about the Santa Fe affair, and seem determined to take armed possession at once. Gov. Bell has issued commissions for the raising of troops to persons in almost every county. The following, from a letter of Col. Thomas M. Likens to Governor Henderson, is a specimen:

"I shall, by virtue of a commission which I hold from Gov. Bell, enrol and organize a company of one hundred men for the Santa Fe expedition, on the 27th inst. Should ten or twelve clever fellows, well mounted on mules, from your county, meet me on that day, they shall not be disappointed in getting situations—please let me know."

Another is as follows:

"In obedience to an order from his Excellency the Governor, I am commissioned to enroll and organize a full company, to number in the aggregate one hundred men to be received and enrolled respectively from certain counties, so that all portions of the state may participate in a military expedition to Santa Fe, to support the rights of the state to the disputed territory. Therefore notice is hereby given to the citizens of San Augustine county, that ten members will be received into the company, if they will meet me at Shelbyville on Wednesday, the 31t day of July inst. and give me their names.

"The company will be required to march for its destination by the 1st day of September next. This, the 17th July, 1850. Respectfully,

"J. M. SMITH, of Shelby."

As the Indians on the Texas frontier continue to be very troublesome, it is very probable that our new and sister state had better apply her military energies in that quarter.

JONES' GRAND REAL ESTATE LOTTERY.

The largest Real Estate Lottery ever held in the United States—of 500 Lots, with the Improvements, in the city of San Francisco.

500 *Prizes of One Lot each.*

THE LOTS and Improvements vary in value from the capital Prize of $50,000 down. The property is divided into Four Thousand shares or tickets of $100 each, so that on an average *one in every eight shares* is almost certain of drawing some one of the prizes.

The plan of Drawing will be as follows, viz: The last drawn number will be entitled to the *highest prize;* the number drawn next to the last will be entitled to the next highest prize, an so on, to the number of Twelve of the highest prizes. The other 488 prizes will be drawn indiscriminately from one glass wheel, while the numbers of the tickets are drawn from another wheel against them, so that when the number of a ticket is drawn, the tickets drawn from the other will contain the description of the lot which the holder of the ticket is entitled to, or some other equally simple mode will be adopted.

The drawing will be in public, so that the ticket holders may see that it is properly conducted.

The lots are the property of Dr. Elbert P. Jones, he having acquired most of them several years since. The titles are indisputable. Warrantee titles with possession will be given immediately after the drawing. The taxes of every description have been paid on all this property, so that the fortunate drawers will have their lots free of all those charges for one year.

The whole property is put up at a remarkably low cash valuation, as the water lots, with eight or ten others in the list are worth the whole amount of the money.

The locality of a portion of the lots will be found below. Full catalogues and plans may be seen at our Auction Room, 276 Montgomery street, viz:

Lot in block corner of California and Kearny streets, 57½ feet front by 137½ feet deep, with the large splendid three story banking house and improvements, now occupied by E. P. Jones.

Lot with warehouse on Washington street between Montgomery and Sansome streets, front on Washington st 28 ft by 80 ft deep, with an L 20 by 45 ft, fronts on Jones alley.

Lot on corner Pacific and Battery sts; 4 lots adjoining on Pacific st, all piled and capped ready for buildings.

2 lots on Battery st, adjoining the above, next to the new Iron Custom house.

2 lots south of iron custom house.

The Forrest Divorce Case before Court.—Mr. Edwin Forrest has made his declaration of complaint before the Judges of the Court of Common Pleas of the city and county of Philadelpbia, in the case of his wife. It is the beginning of the suit for a divorce. The following is the complaint:

To the Hon. the Judges of the Court of Common Pleas of the City and County of Philadelphia:

The libel and petition of Edwin Forrest respectfully represents: That on the —— day of ——, A. D. 1837, he was lawfully joined in marriage with Catharine Sinclair, his present wife, and from that time hath lived and in all respects demeaned himself as a kind and affectionate husband, and although, by the laws of God as well as by their mutual vows they were bound to that chastity which should be inseparable from the marriage state, yet the said Catharine Forrest, in violation of her marriage vow, hath, for a considerable time past, given herself to adulterous practices, and has been guilty of adultery with a certain George Jamison, at Cincinnati, in the State of Ohio, to wit, in the county of Philadelphia, aforesaid, and within the jurisdiction of your honors, and also with the said George Jamison at the city of New York, in the State of New York, to wit, in the county of Philadelphia, aforesaid, and within the jurisdiction of your honors, and also with one N. P. Willis, at the city of New York, aforesaid, and also with one Samuel Marsden Raymond, at the city of New York, aforesaid, and also with one Richard Willis, at the city of New York, aforesaid, and also with one —— Calcraft, at the city of New York, aforesaid, and also with one John B. Rich, at the city of New York, aforesaid, and also with one Henry Wickoff, at the city of New York, aforesaid, and also with one Wm. H. Howard, at the city of New York, aforesaid, and with divers other persons whose names are at present to this libellant unknown. Wherefore, your libellant, further showing that he is a citizen of the commonwealth of Pennsylvania, and has resided therein for more than one whole year previous to the filing of this his libel, prays your honors that a subpœna may issue to summon the said Catharine Forrest to appear in this honorable Court at September term next, to answer this complaint; and that a decree may be made, divorcing this libellant from the marriage bond aforesaid, as if he had never been married, or as if the said Catharine Forrest was naturally dead.

And this your libellant will always pray, &c., EDWIN FORREST.

Edwin Forrest, being sworn, says that the facts set forth in the foregoing libel are true, to the best of his knowledge and belief, and that the said complaint is not made out of levity and by collusion between him and her, the said Catharine, and for the mere purpose of being freed and separated from each other, but in sincerity and truth for the cause mentioned in the said libel.

EDWIN FORREST.

Sworn and subscribed before me, an Alderman of the city of Philadelphia, this 7th day of August, 1850.

JOEL COOK, Alderman.

ARCTIC EXPEDITION.—Intelligence of the expedition in search of Sir John Franklin has reached the Navy Department, dated at Whalefish Island, June 29. All was safe and very well, though icebergs had been encountered by the vessels. Lieut. De Howen says:

"We shall leave to-day, and proceed to the North, touching at Uppernavik, if wind and weather will permit. Thence we shall make for Lancaster Sound. Should Wellington Strait be open on my reaching it, and finding that none of the English vessels have entered it ahead of me, I shall make a bold push for the North and West in that direction."

THE NORTH YUBA.—A gentleman just down from Downieville, on the fork of North Yuba, reports that the labor of the miners in that quarter for the past season, has been attended with considerable success. Nine tenths of those who were engaged in turning the bed of the river, have been amply rewarded for their toil. This news is cheering; for we had begun to fear that damming operations were totally unsuccessful, from the account brought in from the various quarters. Coyote Diggings in that vicinity have also been successful. Downieville is reported to be a town of some size, and many of the miners intend wintering at this place, and are now building or making preparations to reside there during the rainy season. [Times.

THE LOST MAIL.

By some oversight the mail for New York city from California failed to arrive by the steamer Georgia. It is not easy to calculate the consequences of this slight omission. Merchants expecting advices of consignments or fresh orders are left in suspense for a week, and possibly a fortnight, in which time advantageous opportunities for trade may be irrecoverably lost. Others who were relying upon drafts or bills receivable contained in that mail are embarrassed in meeting their obligations at home. The loss or detention of a single mail may affect money transactions to the amount of thousands of dollars. But the most serious evil arising from this cause is the trial of the affections of many who were anxiously awaiting intelligence from friends. The lonely wife, whose husband has gone to El Dorado to better his condition and to lay up in store for his family—the widowed mother whose son has been enticed to the shores of the Pacific by the love of adventure or the vision of gold, having watched day after day for the arrival of the steamer, reads its announcement in the morning news, and her impatient heart chides the postman for his delay in bringing tidings from the absent loved one. But no letter comes. What troubled thoughts crowd that longing heart. 'Has any evil befallen him? Is he sick and helpless, so far away!' 'Perhaps,' Hope suggests, 'perhaps he is already on his return, coming to take me by surprise.' And then follows the dreadful conjecture—that absence may have made him careless and forgetful. But every supposition gives way to an aggravated suspense when it is announced that there is no mail, and that crushed and burdened spirit revives only to renew its watching for another weary week. Hope deferred makes the heart sick.

What an element of civilization is the mail; what an indispensable of life, entering into its dearest affections and its most momentous concerns. Little do they who handle carelessly the foreign mail-bag, or even the little village mail, tossing it hither and thither, not regarding whether it is put in place and duly forwarded to its destination; little do such think with what treasures of love and hope, of joy and grief, every such mail is freighted. The heart of this great, busy, teeming, panting, sorrowing world, is bound up in each day's mail.—[Independent.

MUNIFICENCE OF EDWARD EVERETT. Ex-Governor Everett recently made a communication to the mayor and aldermen, offering to the new free library, which is to be established for the benefit of the citizens of Boston, upon the basis of the gift of $1,000 from his honor the mayor, his collection of state papers and public documents. They amount to about one thousand volumes, including almost everything which has been issued from the formation of the government up to 1849. They are bound and carefully arranged, and Mr. Everett proposes to add similar papers up to the present time, and other works on the history of our country. Such men need no tombstones.—[Ib.

The New American Minister for the Hawaiian Islands.—Hon. Luther Severance, the able editor of the Kennebec Journal, as is known to some of our readers, has been appointed as our diplomatic agent to the Sandwich Islands. Few of our exchanges come to hand more welcome than his, and for many years we have read his journal with much interest. We quote an extract or two from his valedictory, of Aug. 15. We are glad to see, once in a while, an editor receive an appointment like this. None do so much "for their country" as they, and, generally, they are the last to be benefitted by their labors.

It is not stated when Mr. S. leaves for his new field of labor. We believe that he will do credit to the office as a worthy representative of the American people in those islands.

"All the readers of the Journal probably know by this time that I am about to embark on a distant voyage. This is the last paper in which I shall probably have anything to say for some time to come.

"It has always been my design to exert a wholesome influence in the community, and to make the paper useful, rather than by publishing that which is pernicious. There is a great deal of reading matter afloat on the sea of newspaper and pamphlet circulation which is worse than useless. It vitiates the public taste, and occupies the leisure moments of youth to the exclusion of that which is useful. This I have endeavored to shun, though, perhaps, not always with success, for in endeavoring, to some extent, to meet the popular demand for story reading. I have not always been able to find that which was free from objection. It has always been my design to put the readers of the Journal, as far as its limits will admit, in possession of all the most important events of the day, though in doing this, matter far more amusing to many may have been excluded.

"I take no final leave of the readers of the Journal, some of whom have taken the paper from its commencement, in January, 1825, for I may find it convenient, still to hold intercourse with them occasionally, though in a far distant land; and whether leaving to return or not, they may rest assured of my earnest and constant solicitude for their welfare.

"It would not be an unfit occasion to revert to the mighty events of the last quarter of a century, in Europe and America, and the prospects of the future, but I have not now the time or space, nor can you desire me to bore you with an essay. The civilized world is now full of busy men, and full of writers, eager and anxious to give their thoughts to the public. In this crowd those who speak the briefest are the most likely to be heard. By retiring from the editorial arena I fall into the regular course of events. I shall be no more missed than the smallest star in the milky way. I but conform to the laws of human progress, since who can doubt that every succeding generation, adding its own discoveries to the treasures of the past, must go on increasing in knowledge, and becoming wiser and more elevated in the scale of being. So may it ever be, and may our own country always be foremost in the race of peaceful improvement, growing more generous and more just, with her increasing power and extended dominion.

LUTHER SEVERANCE."

GOLD.—The most beautifully formed specimen of pure gold that we have yet seen was shown to us at Ford & Goodwin's store, on Tuesday last. Its weight was only ten oz.; but its singular and beautiful formation renders it truly valuable far beyond its intrinsic worth, as a cabinet specimen. It was the property of Benj. Vesey, a Green Mountain boy. It was taken from the dry diggings in the vicinity of Toles'. Three men a few days since took out twenty-five hundred dollars in the immediate vicinity. We are credibly informed that on Dry Creek, fifteen miles above Marysville, the miners, who work, average an ounce and a half a day. Those who become discouraged in a day, set down to suck their thumbs and are homesick because they don't get a pound to a shovel of earth, can't make anything.

And had better staid at home with the girls who love them dear,
Than to come to California at any season of the year.

Those who wish to succeed in gold digging must have patience, perseverance and indomitable industry. Hope and they will succeed.—[Marysville Herald.

THE REFINEMENT OF CRUELTY.—Kinkel, the poetical professor of law at Bonn, who was tried, six or eight months ago, for participating in the Baden insurrection, and sentenced to imprisonment for life, is removed every three months from one prison to another. These repeated removals of the unfortunate poet have their origin in a species of refined cruelty which seems incredible. They are intended solely to prevent him from having any communication with his friends, for an old law exists which prescribes that no prisoner shall be permitted to see visitors until he shall have been three months in prison. His hard case excites much commiseration, not only in Prussia, but in countries where his poetry has made him known.

THE PEOPLE OF THE STATE of California, District of the County of Santa Clara: Jose De Arnaz vs. Genoveva Garcia Mangel, Emanuel Mangel and Lorenzo Geoffrey. Petition to foreclose mortgage, &c.:

Whereas, JOSE DE ARNAZ filed in this Court on the 16th day of May, 1850, his petition, showing, among other things, that on the 20th day of December, 1849, Genoveva Garcia Mangel, the wife of Emanuel Mangel, was the owner in fee of a certain house and lot in San Jose, adjoining and in the rear of the house lately occupied by Messrs. Larrain, Benitez & Co., and fronting on Garcia street, did on that day mortgage the same, with the consent of Emanuel Mangel, her husband, to said Arnaz, to secure the sum of five hundred and sixty dollars, payable four months from date: That afterwards, on or about the 15th day of January, 1850, said Emanuel Mangel and Genoveva G. Mangel executed a mortgage on the same premises to one Geoffrey, of San Francisco, for about fourteen hundred dollars; which said mortgage was falsely dated the 19th of December, 1849, with intent to defeat the prior mortgage lien on said real estate, and to cheat and defraud said petitioner out of his debt. Said petitioner prays discovery and full answer to the above facts, that said mortgage to Geoffrey be set aside as fraudulent, and that said premises be sold to pay petitioners's mortgage, and for general relief.

And it being proved by affidavit to the satisfaction of this Court that Emanuel Mangel is a non-resident of this State, notice is hereby given to Emanuel Mangel to be and appear before the Honorable Court of the Third Judicial District, for the County of Santa Clara, on the fourth Monday of December, 1850, at the court house in San Jose, then and there to answer said petition, or, in default thereof, the allegation therein contained will be heard in your absence and decreed accordingly.

Given under my hand and private seal, there being no seal of office yet provided at this office, this 21th of May, A. D. 1850.
